ABOUT ME

After years of working as a graphic designer, I began to expand my role into HTML and CSS coding. As that transition happened, I developed a greater interest in code and programming. I decided to begin studying software development full time. I like that coding gives me the opportunity to use my creative background along with my passion for problem solving. I am excited for this new step in my career.

SKILLS

- HTML5
- CSS
- C#
- JavaScript
- SQL
- Azure

Projects

GuildMate

GuildMate is a World of Warcraft Classic guild management application allowing users to create a character and then create or join a guild. The users can view their Roster, create events and sign-up their character to attend the events.

- Utilized C# and .Net
- Built through MVC/Razor Pages
- Authentication via Identity Framework
- Database handling with Entity Framework
- Bootstrap Styling
- Javascipt functionality for certain elements

Fitted

Fitted is a clothing catalog and outfit creation app created to relieve the stress of getting dressed & helping you looking your best each morning. Easy to use Item and outfit views with filters by clothing type, outfit style, or individual items.

- Utilized JavaScript, HTML, CSS, & Internal Database using JSON-Server
- Learned Cloudinary for image storage and photo upload
- Clothing collection database and outfit creation application
- Full CRUD capabilities
- Add/Edit/Remove Items and Outfits
- Filter through items and outfits based on style, type of clothing, or item
- Styled using HTML & CSS

Nutshell

React based application with full CRUD capabilities, allows users to add friends, news articles, and tasks. Users can chat in a public message board as well as view their friends posted content.

- Utilized JavaScript, HTML, CSS, & Internal Database using JSON-Server
- Group project building an social media like application
- Users had chatroom functionality
- Add and Remove Friends
- Post and view articles and and upcoming events based on friends list
- Create a task list

Marketing Coordinator / Graphic Designer

Harry Norman, REALTORS | Jan 2015 - May 2019

- Utilized **Photoshop, Illustrator & inDesign** to create deliverables such as e-flyers, postcards, print/online ads and social media posts
- Developed and placed marketing materials for real estate agents across multiple mediums and platforms
- Update and maintain agents websites using **HTML & CSS**
- Work with print shops and media sources on behalf of the agents to place advertising and orders
- Schedule, design, organize mailing lists and fulfill orders for 90 agents on the office postcard program
- Organize and teach classes regarding our In-House CRM program
- Maintain on-boarding processes for new agents (keycards, business cards, sign orders, resource logins)
